Mohamed El Fares Slimani

faresslimani0@gmail.com|+213 558 139 901|linkedin.com/in/faresslimani01|github.com/MFaresSlimani

Senior Mobile Engineer specializing in Flutter development, scalable app architecture, and backend-integrated systems. Delivered multiple production apps in telecom, fintech, and digital identity verification, used by thousands of ICOSNET clients. Experienced with Django-based backend development, token-secured APIs, NFC/MRZ identity flows, and enterprise system integrations (WHMCS, Dynamics NAV, Alfresco, Jitsi). Strong ownership of end-to-end delivery—from architecture and implementation to deployment, performance optimization, and cross-team coordination. Skilled in shipping stable, multilingual mobile applications to both major app stores.

Skills

- **Mobile Development:** Flutter, Dart, Clean Architecture, REST APIs, WebSockets, NFC, MRZ, Jitsi SDK, Localization.
- **Backend & Integration:** Django, DRF, Token Auth, WHMCS, Microsoft Dynamics NAV, Alfresco, WHOIS APIs.
- **Programming Languages:** Dart, Python, C++, Java.
- **Data & AI:** TensorFlow, sklearn, OpenCV, NLP (nltk).
- **Tools:** Git, GitHub/GitLab, Linux, CI/CD basics, Google Play Console, App Store Connect.
- **Languages:** Arabic (Native), English (Fluent), German/French (Intermediate), Turkish (Beginner).

Experience

Senior Mobile Engineer, ICOSNET SPA — Aug 2025 – Now

- Led development of multiple production-grade mobile apps for telecom clients, including video conferencing, fintech payments, digital identity verification, and full client-account management.
- Built and maintained a scalable **Django backend** powering authentication, billing, product management, and customer operations for thousands of ICOSNET users.
- Integrated enterprise systems such as **WHMCS**, **Microsoft Dynamics NAV**, **Alfresco ECM**, and external services including Jitsi, WHOIS, and .dz domain registry APIs.
- Developed secure mobile flows involving **NFC identity reading**, **MRZ scanning**, **liveness detection**, and end-to-end KYC onboarding.
- Delivered polished multilingual apps with PIN-secured access, notifications (FCM/APNs), smooth UI/UX, and optimized performance.
- Coordinated with backend and web teams, contributed to API design, managed tasks and releases, and published stable builds to both app stores.

Adjunct Instructor – Operating Systems, HMI & Data Mining, UYFM & UMBB — 2024 – Now

- Delivered practical C++ and Linux-based Operating Systems sessions to undergraduate students.
- Taught Human–Machine Interaction (HMI) and Data Mining courses at UMBB, focusing on applied concepts and hands-on implementation.

Freelance Flutter Developer — 2022 – Now

- Delivered 15+ apps tailored for Algerian businesses and social causes.
- Focused on performance, clean UI, GetX architecture, and backend integrations.

Programming Instructor, Private Schools — 2022 – 2025

- Delivered AI, web and programming lessons at Benyan Tech, CTL School, and Kafil Al Yateem.

Education

PhD in Artificial Intelligence, Boumerdès University — Feb 2025 – Now

Master's in Systems Engineering Web Technologies, University of Medea — 2022 – 2024

Bachelor's in Computer Science, University of Medea — 2019 – 2022

Certifications & Publications

3D Avatar for Algerian Sign Language – Nafath Majlis, Qatar — Dec 2024
DOI: 10.54455/mcn2804
3DZSignDB Dataset – Zenodo — Mar 2025
DOI: 10.5281/zenodo.15020376
Fundamentals of Deep Learning, Nvidia — Oct 2022
Goethe Zertifikat B1, German Proficiency — Feb 2023

Community & Volunteering

- Member of **Kafil Al Yateem**, **Al Kalam**, **Nass El Khier**, **Google Developers Group Medea**, and **Techverse**.
- Delivered training workshops in coding and app development.
- Background in athletics and calisthenics.
