Summary

Mobile Engineer specializing in Flutter development, scalable app architecture, and backend-integrated systems. Delivered production apps in telecom, fintech, and digital identity verification for ICOSNET clients. Experienced with Django-based backend development, token-secured APIs, NFC/MRZ identity flows, and enterprise system integrations (WHMCS, Dynamics NAV, Alfresco, Jitsi). End-to-end delivery from architecture and implementation to deployment and performance optimization, working closely with a strong team. Skilled in shipping stable, multilingual mobile applications to both major app stores.

Skills

Mobile Development: Flutter, Dart, Clean Architecture, GetX, Riverpod, REST APIs, WebSockets, NFC, MRZ, Jitsi SDK, Localization

Backend & Integration: Django, DRF, Token Auth, Supabase, WHMCS, Microsoft Dynamics NAV, Alfresco, WHOIS APIs

Programming Languages: Dart, Python, C++, Java

Data & AI: PyTorch, TensorFlow, scikit-learn, OpenCV, NLP (NLTK)

Tools: Git, GitHub/GitLab, GitHub Actions, Linux, Google Play Console, App Store Connect

Languages: Arabic (Native), English (Fluent), German (B2, ECL), French (B2)

Experience

ICOSNET SPA, Mobile Engineer — Algiers
Aug 2025 – present
1 year 4 months

- Developed production-grade mobile apps for telecom clients, including video conferencing, fintech payments, digital identity verification, and full client-account management.
- Built and maintained the Django backend powering authentication, billing, product management, and customer operations for ICOSNET customers.
- Integrated enterprise systems such as WHMCS, Microsoft Dynamics NAV, Alfresco ECM, and external services including Jitsi, WHOIS, and .dz domain registry APIs.
- Developed secure mobile flows involving NFC identity reading, MRZ scanning, liveness detection, and end-to-end KYC onboarding.
- Delivered multilingual apps with PIN-secured access, notifications (FCM/APNs), smooth UI/UX, and optimized performance.
- Collaborated with an amazing team through code reviews, shared architecture decisions, API design with backend and web colleagues, and coordinated releases to both app stores.

UYFM & UMBB, Adjunct Instructor, Operating Systems, HMI & Data Mining — 2024 – present
2 years

- Delivered practical C++ and Linux-based Operating Systems sessions to undergraduate students.
- Taught Human-Machine Interaction (HMI) and Data Mining courses at UMBB, focusing on applied concepts and hands-on implementation.

Independent, Freelance Flutter Developer — 2022 – present
4 years

- Delivered 15+ apps tailored for Algerian businesses and social causes.
- Focused on performance, clean UI, GetX and Riverpod architectures, and Supabase/backend integrations.

Private Schools, Programming Instructor — 2022 – 2025
3 years

- Delivered AI, web and programming lessons at Benyan Tech, CTL School, and Kafil Al Yateem.

Education

PhD **Boumerdès University**, Artificial Intelligence — Feb 2025 – present

MSc **University of Medea**, Systems Engineering, Web Technologies — 2022 – 2024

BSc **University of Medea**, Computer Science — 2019 – 2022

Certifications & Publications

3D Avatar for Algerian Sign Language, Nafath Majlis, Qatar — Dec 2024
DOI: 10.54455/mcn2804

3DZSignDB Dataset, Zenodo — Mar 2025
DOI: 10.5281/zenodo.15020376

Fundamentals of Deep Learning, NVIDIA — Oct 2022

Goethe-Zertifikat B1, German Proficiency — Feb 2023

Community & Volunteering

- Member of Kafil Al Yateem, Al Kalam, Nass El Khier, Google Developers Group Medea, and Techverse.
- Delivered training workshops in coding and app development.
- Background in athletics and calisthenics.
